

ARIF AHMAD KHAN

AI Engineer | Agentic AI | Generative AI

 ahmadarif238@gmail.com |  +92 343 8992587 |  github.com/ahmadarif238 |  linkedin.com/in/arif-a-0b85

AI Engineer with strong expertise in Agentic AI, Retrieval Augmented Generation systems, and large language model based backend applications. Experienced in building multi agent workflows using LangGraph, LangChain, scalable APIs with FastAPI, and enterprise level AI assistants grounded in vector databases. Proven ability to design production ready AI agents, and intelligent chatbots, integrate automation tools such as n8n and Zapier, and deliver end to end systems that solve real world operational problems.

EDUCATION

B.S Software Engineering	University of Malakand	2021 – 2025
CGPA: 3.65 / 4.0		

CORE SKILLS

AGENTIC AI & LLM SYSTEMS

- RAG (Retrieval-Augmented Generation) & Vector Search
- LangGraph, LangChain, Agentic AI
- Ollama, Transformers (Hugging Face)
- Groq & Cerebras, OpenAI, Prompt Engineering

BACKEND, CLOUD & DATABASES

- FastAPI, AWS, Vercel, Docker, Git
- Vector: Pinecone, Weaviate, FAISS
- Relational: PostgreSQL, MySQL, Supabase

PROGRAMMING & DATA

- Python, SQL
- Pandas, Numpy

ML FRAMEWORKS & AUTOMATION

- TensorFlow, Keras, Scikit-learn
- Zapier, n8n, Make, Webhooks

PROFESSIONAL EXPERIENCE (PROJECTS)

Smart Supply Chain Management Agent

Agentic AI | LangGraph | FastAPI | PostgreSQL | Docker

- Engineered an autonomous multi-agent system to manage inventory 24/7, replacing manual workflows with self-correcting AI agents.
- Implemented a hybrid engine combining Linear Programming and LLMs to forecast demand and autonomously negotiate purchase orders within budget.

AI Operations Copilot for Internal Teams

LangGraph | FastAPI | RAG | Groq Models

- Built a multi-agent system to automate IT operations, including policy Q&A, log monitoring, and ticket generation.
- Developed RAG architecture using Groq Models for intelligent retrieval from standard operating procedures (SOPs).
- Deployed scalable solution with FastAPI and PostgreSQL/Redis.

Voice-Enabled AI Executive Agent

LangChain | Groq LLM | Streamlit | Google APIs

- Developed a voice-enabled AI agent capable of managing emails, calendar events, and web searches via natural language commands.
- Integrated LangChain, Groq LLM, and Google APIs to enable seamless real-time voice and text interaction.

Stock News Alert Agent

Python | Groq Models | Telegram Bot API

- Created an AI agent that monitors real-time financial news and delivers instant sentiment-analyzed alerts via Telegram.
- Integrated Groq Models to summarize market impact and Python for automated RSS parsing.

AI-Powered Lindy-Style Sales Automation Agent

Python | Groq Models | LangChain | CSV Automation

- Designed a full-stack AI sales assistant to automate the outbound sales pipeline, including lead generation, scoring, and personalized outreach.
- Built with modular agents using Python, LangChain, and Groq Models for varying sales tasks.

INTERNSHIP EXPERIENCE

Computer Vision Intern | ITSOLERA Pvt. Ltd

Jul 2024 – Oct 2024

- Developed real-time pedestrian detection systems using Python and OpenCV.
- Built object detection pipelines robust to low-light, rain, and fog conditions.
